

Power solutions as Somalia

Goodlight Energy is a premier provider of sustainable energy solutions in Somalia and East Africa. We specialize in reliable, eco-friendly energy products and services, including solar panel installations, power inverters, and maintenance. Our mission is to empower communities with clean energy for a brighter, more efficient future.

Power Africa supports Somalia's clean energy transition to address cost and reliability. Through targeted support to energy service providers (ESPs) like NECSOM, the National Power Corporation, Power Africa is improving the investment readiness of the sector and developing feasibility studies to evaluate new technology and business models.

The Government of Somalia is working with several partners to transition to renewable energy, as highlighted in the Somalia Power Master Plan and Somalia National Development Plan. Remedies...

Ipost is a key contributor to Somalia's energy sector, specializing in the provision of reliable and sustainable energy solutions, including solar power and generator supply. Our commitment to delivering efficient, cost-effective, and eco-friendly energy options aligns with the growing global demand for sustainable energy sources.

This report examines the evolution of the energy sector in Somalia, one of the least electrified countries in the world, and its role in the country's political, economic, and conflict dynamics. The study reviews the energy practices of the missions deployed by the UN and the African Union.

Somalia's power sector faces significant challenges, including lack of sufficiently trained labor, a weak regulatory environment, high investment costs, scarcity of energy production supplies, and poor infrastructure.

Somalia has no mandatory standards in place for off-grid solar products. However, programs such as the World Bank- funded Somalia Electricity Recovery Project and Somalia Electricity Access Project (SEAP) require products to adhere to IEC quality standards. Somalia has no specific laws and regulations on e-waste.

Investments

The AMP Somalia project will start with pilot projects to demonstrate the viability of minigrid hybridization, which will provide electricity to 66,670 people, half of them women, while avoiding nearly 30,000 tCO₂eq direct emissions.

Greensom is a Somalia-based green energy company that delivers Sustainable solutions to the lack of electricity access problem facing the Somali community. Our primary focus is to utilize renewable energy sources to generate electricity that is affordable and accessible for all Somali communities and businesses.
