Transforming Uganda"s energy landscape. The completion of the Karuma Hydro Power Plant and beginning of commercial operation in June 2024 mark a significant leap for Uganda"s energy sector. Key benefits include: Increased Power Generation: With an additional 600 MW, Uganda"s total generation capacity surged from 1,400 MW to 2,000 MW.

The dedication of the AFRY team, combining expertise from both Switzerland and Uganda, with many relocating to the site, has been instrumental in this achievement. This milestone not only demonstrates our commitment but also represents a significant step in advancing Uganda"s sustainability journey.
