

As industries across Southern Africa grapple with the urgent need for sustainable, reliable and cost-effective energy solutions, Probenenergy, a division of Probe Corporation, has unveiled a new solution: the Enerbond supercapacitor battery. The decision to import the Enerbond supercapacitor battery underscores Probenenergy's commitment to ...

Most lithium-ion batteries last between two and three years, or 300 to 500 charge cycles, depending on which comes first. One charge cycle is completed when the battery runs from fully charged, to completely discharged, and then recharged again.
