Are solar PV prices going down?

Nonetheless, rapid price declines in solar PV have not been without controversy. China, for example, has played an outsized role in scaling up the mass production of solar PV cells and modules, comprising 78% of global production in 2021 9,10 (Fig. 1).

What is the supply chain for solar PV?

The supply chain for solar PV has two branches in the United States: crystalline silicon (c-Si) PV, which made up 84% of the U.S. market in 2020, and cadmium telluride (CdTe) thin film PV, which made up the remaining 16%. The supply chain for c-Si PV starts with the refining of high-purity polysilicon.
