

Promethean power systems Moldova

Promethean's Rapid Milk Chiller Premium is a modular milk chilling system that can cool from 35 °C to 4 °C without a diesel generator. The system cools in 2 stages. First the milk is poured on the Rapid Milk Chiller which instantaneously chills the milk to 8 °C with a flow rate of 350 litres/hour. The chilled milk is then stored in the SS tank which cools the milk gradually to 4 °C.

Promethean Power Systems designs and manufactures innovative cooling systems to enable access to sustainable cold chain. | Promethean designs and manufactures modular energy storage systems for refrigeration applications. Our energy efficient solutions include bulk milk coolers, rapid milk chillers, cold ...

Director, Promethean Power Systems . Sorin is co-founder and director at Promethean. He served as the company's Chief Executive Officer and Chief Technical Officer and is the principal inventor of the company's patented energy storage technology. Sorin graduated with a Masters of Science in Engineering & Management degree from MIT.

Jiten joined Promethean in India in early 2015 as CFO. He was promoted to CEO based on his skill at making operations more efficient and turning Promethean into a company that now turns a profit. Today he is on Promethean's board.

Promethean Power Systems - Manufactures and supplies cold storage and milk chilling equipment for dairy industry. Raised a total funding of \$1.87M over 4 rounds from 11 investors. Valued at \$2.32M. Founded by Sam White and Sorin Grama in the year 2007. Promethean Power Systems has 17 competitors.

Promethean Power Systems designs and manufactures refrigeration systems for cold-storage and milk chilling applications in off-grid and partially electrified areas of developing countries. Our goal is to empower smallholder farmers through ...

Promethean power systems Moldova

Promethean Power Systems Rapid Milk Chiller helps chill milk even in the most remote places where electricity trickles in intermittently. Promethean's Rapid Milk Chiller is based on thermal energy storage technology which has dual benefits. This milk chilling system instantly cools milk from 35 degrees Celsius to 4 degrees Celsius without the ...

Promethean's Micro Can-Chillers are cost-effective way to ELIMINATE SPOILAGE & procure HIGHER MBRT milk by arresting bacterial growth at the VLCC & farm level itself. These stand-alone units can chill UPTO 6 CANS PER SHIFT & can be a great add-on to an existing "Chilling Centers" to expand its catchment area & also REDUCE COST OF PRIMARY ...

Promethean Power Systems" thermal battery stores thermal energy in the few hours when the grid is available and releases the energy when needed to provide cooling power. "We recently received a new, large order from one of India's largest dairies that happens to be an existing customer. Repeat orders are important to us because it proves ...
