

# Proterra battery Pitcairn Islands

Where are Proterra batteries manufactured?

Proterra batteries are manufactured in Greer, South Carolina. They are designed in Proterra's Silicon Valley and engineered by the best minds in battery technology. Proterra battery systems are safe, reliable, and efficient. Rigorous vehicle testing and validation programs ensure the highest standards of safety. The compact design enables industry-leading energy density, by volume and mass.

What is a Proterra S series battery?

The Proterra S series batteries already power medium- and heavy-duty applications on the roads throughout North America. Battery packs in the S series have a width of 860 mm and can contain up to 123 kWh of energy storage per pack.

Is Proterra's battery technology a threat?

Proterra's battery technology is proven solid, and they have a years-long lead over other competitors still in the design phase. New battery chemistries you read about and other companies raising funds for are not a threat, as they will take years to prove themselves before being adopted in the marketplace.

Does Proterra recycle lithium ion batteries?

Instead of sending batteries to a hazardous waste incinerator, Proterra works with top-tier recycling companies that specialize in extracting and repurposing materials inside lithium-ion automotive batteries, recovering precious metals used in Proterra batteries.

Are Proterra EV batteries good for commercial vehicles?

Our flexible design enables Proterra's EV batteries to be the best choice for commercial vehicles ranging from transit buses and trucks to delivery vehicles, construction equipment, and more. The Proterra S series batteries already power medium- and heavy-duty applications on the roads throughout North America.

Who is Proterra energy?

Find out more. Proterra Energy specialises in the design, installation, and maintenance of renewable energy systems. Whether you are on or off-grid, we can help you create a system that is reliable, cost-effective, efficient, and suited to your needs.

Every day at Proterra, we're making change happen. From our Silicon Valley Innovation Center to our Powered 1 Gigafactory in South Carolina, our mission is to build innovative battery technology to power a better, more sustainable world. Today, as a stand-alone business owned by Volvo Group, we are stronger and more determined to fulfill our ...

When you partner with Proterra to electrify your medium- or heavy-duty electric vehicle or equipment, our expert team works with you through every step to. ... Our expertise in integrating battery packs into

The Volvo Group has today completed the previously announced transaction whereby the Group acquired the battery business from Proterra Inc. and Proterra Operating Company Inc. The acquisition, which was made at a purchase price of USD 210M before adjustment for inventory level at closing, includes a development center for battery modules ...

\*Range calculations based on WVU 5-Peak cycle at 76-88°F with 113kWh Proterra battery and installed bus body. Operating efficiency will vary with route conditions, vehicle configuration, ambient temperature, driving habits, etc. 113 kWh. Proterra Battery. 280 kW. Traction Motor ~70 mph / 112 kph. Max Speed.

Proterra is a US-based provider of battery packs for industry, electric buses and EV charging infrastructure and is in a voluntary Chapter 11 bankruptcy process, with the transaction expected to close in 2024. Volvo ...

The Volvo Group announced the acquisition of the battery business from EV company Proterra and Proterra Operating Company. The deal was valued at \$210 million before adjustment for inventory level at closing. The acquisition includes a development center for battery modules and packs in California and an assembly factory in Greer, South Carolina.

The buses, which will be designed and built at Proterra's Los Angeles County manufacturing facility in California, are scheduled to be placed in service late next year. The battery-electric buses are funded in part by a \$3.8m zero-emissions vehicle grant from the Federal Aviation Administration and will replace the older CNG buses.
