

Puerto Rico solar turbines incorporated

Who makes Solar Turbines?

Powering the future through innovative, sustainable energy solutions. Solar Turbines Incorporated, headquartered in San Diego, California, is a wholly owned subsidiary of Caterpillar Inc. Solar manufactures the world's most widely used family of mid-sized industrial gas turbines, ranging from 1 to 39 megawatts.

How many Solar Turbines are there?

Solar Turbine Incorporated's product line currently consists of the Saturn, Centaur, Mercury, Taurus, Mars and Titan turbines, and a variety of attachments that are sold with them. To date, Solar has sold more than 15,000 gas turbine systems, with a combined operating history of over 2 billion hours of use, equivalent to over 100,000 years.

When did Solar Aircraft Company start?

The company traces its history to the 1927 founding of the Prudden-San Diego Airplane Company, which became the Solar Aircraft Company in 1929. Through the Great Depression, they mainly produced components for other manufacturers, growing during World War II and diversifying into non-aircraft products after the war.

How much power does a solar turbine have?

The latest model, the Titan 250, delivers 30,000 horsepower (22,000 kW). Solar Turbines Incorporated has also been involved in a number of projects to improve the fuel economy of industrial turbines of all sorts. In 1992, Solar Turbines introduced the SoLoNOx system.

Can Solar Turbines improve fuel economy?

Solar Turbines Incorporated has also been involved in a number of projects to improve the fuel economy of industrial turbines of all sorts. In 1992, Solar Turbines introduced the SoLoNOx system. The SoLoNOx system uses lean-burn technologies to reduce NOx emissions.

Does a solar turbine have a SoLoNOx system?

In 1992, Solar Turbines introduced the SoLoNOx system. The SoLoNOx system uses lean-burn technologies to reduce NOx emissions. The SoLoNOx system has been retrofitted to over 2,000 turbines and all of Solar Turbine's more recent designs can be equipped with SoLoNOx as a feature.

Harness the most reliable and consistent green energy source--water. The Variable Flow Hydropower System (VFH Turbine(TM)) generates peak energy from fluctuating water sources like pump stations, water treatment plants, industrial discharge, canals, pipelines, and small rivers worldwide -- which is how our technology differs from conventional impoundment ...
