

Qatar recurve energy

What is Recurve?

Recurve is a company that connects the dots between efficiency, electrification, renewable energy, and DERs to enable demand flexibility to become a market-based procurable resource. Since 2015, they have dedicated themselves to creating transparent methods and open-source software to revolutionize the way energy efficiency is measured, deployed, and procured.

How much energy does Qatar produce?

The International Renewable Energy Agency stated that Qatar's total domestic energy supply in 2020 consisted of 91% gas and 9% oil, with only 0.02% of the country's energy produced from renewable sources.

Does Qatar need solar energy?

On the renewable energy front, Qatar aims for solar energy to constitute 30% of its electricity-generation capacity by 2030. In October 2022 the country's first solar-PV energy project, the 800-MW Al Kharsaah power plant, started operating and now supplies around 10% of domestic peak energy consumption needs.

What is QatarEnergy doing with Chevron?
