

Who are Qualitas energy?

As expected, Qualitas Energy is present with over 60 of our professionals from various teams: Project Development, Investment, O&M, EPC, Technical, Private Credit, HR, and more. Leading the charge is the head of Qualitas Energy Deutschland GmbH, Borja Caruana. You can find our stand in Hall A1, booth number 343.

What are the characteristics of the Ethiopian energy system?

Accordingly, four particular features of the Ethiopian energy system are worth noting. 1. Per capita energy production and consumption is very low. This calls for significant investment in the energy sector which is inherently capital intensive.

Does Ethiopia have a good energy system?

These and other features reveal that Ethiopia lacks a modern, flexible, reliable, and affordable energy system that could withstand its fast-growing energy demand due to high growth rates of population, urbanization, and industrialization [1]. The existing energy system impinges on the quality of the environment in several ways.

What is energy sector support in Ethiopia?

The focus of energy sector support in Ethiopia is aligned with Power Africa 2.0 objectives, which include advancing sustainable development through private sector led partnerships, promoting economic prosperity, and an increased focus on the enabling environment, transmission, and distribution. Technical assistance provided includes:

Why is energy transition important in Ethiopia?

Energy transition is also one of the major topics in Ethiopia's international development and trade cooperation as it is linked with climate finance, loans and grants, foreign direct investment, and knowledge and technology transfers [1, 2].

Which sector consumes the most energy in Ethiopia?

All in all, energy consumption in Ethiopia continues to be dominated by the residential sector which accounts for 95% in 1990 and 88% in 2018. During the same period, the shares of industry and transport sectors grew, respectively, from 1.3 to 3.7%, and from 1.8 to 5.5%.
