

Quick installation of photovoltaic bracket wrench

How do I install a wall-mount bracket?

Follow the instruction below for the bracket you are installing.) Place the wall-mount bracket on the wall so that the mounting holes in the middle of the bracket align with the center of the stud.) Use a level to keep the bottom of the wall-mount bracket level.

How do you mount an inverter to a bracket?

6 Hang the inverter on the bracket: Align the two indentations in the inverter enclosure with the two triangular mounting tabs of the bracket, and lower the inverter until it rests on the bracket evenly. Secure the inverter to the bracket using the two supplied 5mm screws.

How do I attach the Encharge 10 battery cover?

Check that the screw hole on top of the battery cover aligns with that on the battery. Use the included screw to attach the cover to the battery. Tighten the screw as needed. The Encharge 10 Battery cover is wide and may require two persons to guide smoothly over the battery units.

How do you attach a fixing bracket?

Connect the other leg of the fixing bracket to the first leg, connecting them at one end. It's best to tighten the screw by hand so you can adjust the fixing bracket to the proper tilt angle (see more in the next step). Do the same on the other side so you have all four legs of the fixing bracket attached.

How do I install the Encharge battery?

Tighten the screws as needed.) Turn on the AC circuit feeding the Encharge Battery(ies).) The Encharge Battery LED(s) should flash yellow for the duration of the startup process. If the LED is not flashing yellow, see the following section on Troubleshooting. Use the Enphase Installer Toolkit to commission the Encharge Battery(ies).
