

Reess battery Wallis and Futuna

What is a Reess battery pack?

"REESS" means the rechargeable energy storage system that provides electric energy for electric propulsion of the vehicle. Battery Management System (BMS) and Battery Pack are the two main components of the REESS. As UNECE mentions on the document titled Terminology related to REESS a battery pack may be considered as a REESS if BMS is integrated.

Are Reess batteries subject to thermal cycling test requirements?

At the component level, REESSs are already subject to thermal cycling test requirements for transportation under the HMR. 49 CFR 173.185 requires lithium-ion cells and batteries to comply with the test requirements in UN 38.3, including Test T2: Thermal test, which is the basis of the GTR No. 20 thermal shock and cycling test.

What are the safety risks associated with stranded energy in Reess?

The investigation identified safety risks to first and second responders from exposure to high voltage components and from vehicle fire due to damaged cells in the REESS that could reignite as a result of stranded energy in the REESS.

What is a Reess cell?

GTR No. 20 recognizes that, in general, REESS cells are manufactured with manufacturing controls to mitigate safety problems. Based on current manufacturing control processes, the probability of manufacturing problems within a cell is generally considered to be less than one in a million.

How do I test a Reess battery?

Option 2 is based on ISO-20653, and requires IPX7 level waterproofing. In this test option, the REESS is completely submerged in regular water for 30 minutes such that the lower point of the battery is one meter below the surface or the highest point is 150 mm below the surface (for battery packs with a height greater than 850 mm).

What are the new requirements for Reess?

The new proposed requirements for the REESS are manageable because the overcharge, over-discharge, over-current, over-temperature, and external short-circuit tests are non-destructive tests and can be conducted in serial order.

Fläche: 274 km²; - bestehend aus: Horn-Inseln (Horn/te motu o Futuna/le motu o Futuna) 115 km²; [Alofi 51 km²; (19 km²; 32 km²); Futuna 64 km²; (83 km²)] und Wallis-Inseln (Wallis/te motu o Uvea bzw. te motu o Uvea/le motu o Uvea bzw. le motu o Uvea) 159 km²; [Uvea-Insel (Uvea/Uvea bzw.
