

# Rent for photovoltaic panels installed on the factory roof

Can a solar PV system be installed on a factory roof?

As factories are energy-intensive buildings, installing a solar PV system on the roof of a factory ensures free power can be generated to run everything underneath it. While reducing energy costs, a solar PV installation has the added benefit of demonstrating Corporate Social Responsibility thanks to its environmental credentials.

Can a factory install a solar system?

To bring these energy costs down, many companies harness the power of renewable energy by adding solar panels to their factory and warehouse roofs. Installing a solar system for your factory allows these facilities to produce their own power on-site for free.

Are factory buildings a good case for commercial solar energy?

Factory buildings are an excellent case for commercial solar energy because of their roof type and size. Most big commercial structures have roofs with sufficient space, making factories and industrial plants contextually ideal for solar panel installation.

Can solar panels be installed on a warehouse roof?

Solar panels are also less susceptible to damage from wear and tear because they do not have any moving parts. As a result, you can expect little to no repairs. A typical warehouse or factory roof is the perfect landscape for a solar system. These roofs are usually large and flat with ample room for solar panel installation.

How much can I save by installing solar panels on my roof?

How much can I save on energy costs by installing solar panels on my factory roof? Customers can see a healthy reduction in their bills of up to 80% annually, dependant on the size of the system installed. What is the typical return on investment (ROI) for solar panel installations in industrial buildings?
