Can a landlord install solar panels on a rental property?

Before proceeding with solar panel installations, landlords should assess the feasibility of their rental properties. Factors such as roof condition, orientation, and shading need to be considered. Consulting with solar panel experts or contractors can provide valuable insights into the best options.

Can a rent-a-roof company install solar panels?

Where an installation is owned by a rent-a-roof company, we would expect there to be a signed 'agreement' between the relevant parties, i.e. the homeowner and the rent-a-roof company, such as a lease agreement, with the homeowner agreeing to rent their roof to the company for the purposes of installing solar PV panels.

What is a solar panel rent-a-roof scheme?

The Rent-a-Roof scheme lets people who can't otherwise afford solar panels gain access to them, through installers who will setup solar panels on roofs for reduced prices. Installers can then sell any excess electricity generated back to the grid.

Do you need a lease for PV panels on a residential property?

This guidance provides information for photovoltaic (PV) panel providers and the public about lenders' minimum requirements with respect to consenting to a lease of roof space for the installation of PV panels ('the panels') on the roof of a residential property.

Are solar panels paying rent for your roof?

Technically, they're not paying rent for your roof, because you'll get the benefit of powering your home using solar power instead of grid electricity. They'll make money from the electricity you don't use. All excess electricity generated is sold back to the grid via the Smart Export Guarantee (SEG) scheme.

Can a person own a solar PV installation?

While an individual can own the solar PV panels installed at their property, there are instances where the owner of an installation may be different from the owner of the property or site at which the installation is located.
