What is Resco solar?

The RESCO solar model is an energy service company that provides energy to consumers from renewable energy sources with an authentic concept- Users enjoy the benefits of solar energy without having to pay any upfront costs.

What is Resco solar financing?

In this solar financing model, a third-party service provider (RESCO) owns, installs, operates, and maintains the solar system on behalf of the customer. The RESCO model is often structured as a long-term agreement, typically ranging from 10 to 25 years.

How does Resco sell solar energy?

The RESCO model also sells solar energy through a Power Purchase Agreement (PPA). This is a long-term contract undertaken with the customer by the RESCO organization for 10 to 25 years. The customer's obligation in this scenario lies in buying electricity from the solar system at either fixed or variable prices.

What is a Resco solar power purchase agreement (PPA)?

The RESCO solar model encompasses a harmonious relationship between the service provider (RESCO) and the consumer. Through a Power Purchase Agreement (PPA), the consumer commits to using the energy produced by the solar project and compensates the RESCO at a calculated rate.

What are the financial implications of Resco solar?

Financial Implications: While upfront costs are completely excluded, evaluate the long-term financial implications of RESCO agreements. The RESCO solar model offers several advantages  
Zero Investment: Users enjoy solar benefits without upfront capital expenditure.  
Maintenance Included: RESCOs handle maintenance, ensuring optimal system performance.

What are the advantages of Resco solar?

The RESCO solar model offers several advantages  
Zero Investment: Users enjoy solar benefits without upfront capital expenditure.  
Maintenance Included: RESCOs handle maintenance, ensuring optimal system performance.  
Cost Predictability: Fixed tariffs provide cost predictability, aiding budget planning.

The Renewable Energy Service Company (RESCO) business model has emerged as a popular choice for solar rooftop adoption in the commercial and industrial (C& I) sector. This model allows businesses to install rooftop solar systems without any upfront capital costs, and instead pay for the solar electricity generated by the system at a discounted rate.

RESCO President and CEO Matt Brandrup discussed our cooperative's pro-active approach to challenging supply chain issues over the past few years, how our partnership with ERMCO Transformer continues to [...]
