

En Ric Energy Group el 30,8% de los empleados son mujeres frente al 69,2% que son hombres. En el pasado, la maternidad ha sido el principal obstáculo, pero creo que cada vez es menos evidente en el sentido en el que se comparten bajas y las nuevas generaciones tienen más mentalidad de compartir responsabilidades.

RIC Energy is an independent group and a leader in the development of multi-technology renewable energy projects. With a clear strategy focused on establishing itself as a selective Independent Power Producer (IPP) in mature technologies and markets, the company operates across four continents with a development and construction portfolio ...

Faroe Islands: Energy intensity: how much energy does it use per unit of GDP? Click to open interactive version. Energy is a large contributor to CO₂ - the burning of fossil fuels accounts for around three-quarters of global greenhouse gas emissions. So, reducing energy consumption can inevitably help to reduce emissions.

Drawing on our diverse pool of experts to apply business intelligence to even the most complex challenges faced by the energy industry today. Islands Energy Group is focused on commercial sustainability and innovation within the islands' communities.

The collaboration is the first phase of a long-term ambition to add further tidal energy capacity by Minesto's technology to the Faroe Islands' energy mix. The Faroe Islands have set a goal of producing their entire electricity need from renewable ...

Ric Energy Group ensures the quality of its energy solutions through a rigorous selection process for materials and equipment, adherence to industry standards, and a commitment to ongoing training for our team. We also provide warranties and performance guarantees on our installations, ensuring that our clients receive reliable and efficient ...

Energy in the Faroe Islands is produced primarily from imported fossil fuels, with further contributions from hydro and wind power. Oil products are the main energy source, mainly consumed by fishing vessels and sea transport. Electricity is produced by oil, hydropower and wind farms, mainly by SEV, which is owned by all the municipalities of the Faroe Islands. [1]
