Is Risen a good producer of photovoltaic modules?

As a producer of photovoltaic modules, Risen is in the top 5 best and biggest manufacturer globally. The quality of production is also confirmed by a 30-year warranty against linear power loss in the HJT Sieger series. This ensures that investments to photovoltaic with Risen have long time prediction energy yield.

Why is HJT risen a good choice for photovoltaic installation?

Risen photovoltaic installation is cost-effective and durable. HJT RISEN provides resistance to salt spray, ammonia and increased resistance to moisture, so is a dedicated choice for every environment. This makes the HJT panel a perfect solution for photovoltaics in farms. Photovoltaic panels made in Bifacial technology produce up to 35% more energy.

What happens if a solar photovoltaic module is shadowed?

The shadow will cause the loss of the output power of the solar photovoltaic system. Although the bypass diode installed in the solar photovoltaic module can reduce this loss to some extent, do not ignore the shadow factor. Do not install solar PV modules near fire or flammable materials.
