

Rooftop solar photovoltaic panel fixing

What type of fixing system is used for solar PV panels?

The type of fixing system used will depend on whether the solar PV panels are going to be: ground mounted. Solar PV panels can be retrofitted onto an existing roof, on top of the tiles or other roofing materials, using roof anchors (also called roof-hooks or brackets), mounting rails and clamps.

Can solar panels be mounted on a roof?

Naked have seen it all before and can help you find the perfect Solar mounting system to get your solar panels where you want them. We've all seen Solar PV panels mounted on people's roofs and on the roofs of businesses, so here's a rundown of the options to get them up there. By far the most common method for fixing Solar PV panels to a roof.

How do solar PV roof fixing systems work?

Get more information about solar PV roof fixing systems at the Ecofirst website. Solar PV tracking systems move the PV panels to track the sun, and are claimed to produce up to 30 per cent more electricity than a static array. The downside is the additional cost.

How do you fix a PV system to a flat roof?

There are two fundamental options for fixing a PV system to a flat roof, ballasted or mechanical. A ballasted system adds additional weight to anchor the array to the roof whereas mechanical installations cover two key methods, either they are fixed to the deck penetrating the roof covering or they do not and leave the waterproofing system intact.

Can solar panels be installed on a tiled roof?

Installing solar panels on roofs is a popular choice for several reasons: low chances of shade from nearby objects, ample space that serves no other purpose, and closeness to your home. How are solar panels fixed to a tiled roof? Solar panels are mounted on a system of rails and roof hooks. The rails float above the roof tiles.

Can solar PV systems be installed on a pitched roof?

The guidelines also say that provision must be made for ventilation behind the solar PV modules to provide cooling. With the introduction of MCS012 in March 2012 we would now expect all MCS certified installers of solar PV systems to install solar PV systems on pitched roofs using only MCS012 certified roof fixings.
