Epower Technology became an industry member of the NSF IUCRC eCAT Center.. The eCAT IUCRC center intends to develop and deploy next-generation electrification, resilient sensing/perception, real-time edge computing, and smart infrastructure techniques to achieve higher safety and efficiency, aiming to initiate and accelerate the transformation of mobility ...

In the TIMES-Reunion model, each year is roughly split into two seasons of equal length (sugar season and summer), and each day is divided into 8 time-slices (see Table 1), following the load curve trends. For each season, the load curve is characterized by a peak in the morning, corresponding to the temperature variation, and a peak in the evening, ...

As many other small island states, Reunion Island, a 2512 km² French overseas territories and collectivities (as Mayotte, Martinique, Guyana, Guadeloupe, Saint Pierre and Miquelon) located between Mauritius and Madagascar in the Indian Ocean, is facing a three-fold challenge combining demographics, the environment and energy. More precisely, energy ...
