What is a hybrid solar inverter?

Like regular string solar inverters, hybrid inverters convert solar DC power from strings of solar panels to AC (alternating current) power used to power your home. However, unlike solar inverters, excess solar energy is used to charge a connected battery system or exported to the electricity grid.

What are the best hybrid inverters?

Sungrow SH-RS series are our favourite hybrid inverters due to their numerous features, wide variety of sizes, high backup power rating, simple design and affordability. The SH-RS series is available from 3.0kW to 10kW and features 200% solar oversizing, a digital display, instantaneous backup power, and high efficiency.

How many kW can a 5K inverter handle?

Can handle up to 6.5kW in solar panels. The 5K inverter, until further notice, will NOT be added to the CEC (California Energy Commission) or HECO (Hawaii Electric) lists for grid-connection. However, 5K can still be installed OFF-GRID in these markets. 3X Better! Only 4% losses vs. 14% in today's battery based systems

Are Sungrow batteries compatible with SH-Rs inverters?

Sungrow's SBR and new SBH high-voltage (HV) battery systems are the only battery compatible with the SH-RS inverters and are built using safe Lithium Ferro Phosphate (LFP) cells.
