

How much geothermal potential does Saint Lucia have?

The volcano that sits in the middle of Saint Lucia provides vast geothermal potential. Conservative estimates indicate more than 30 MW of technical geothermal potential; others estimate 170 MW. Estimates also show that development of this geothermal resource would likely be economically feasible.

How much electricity does Saint Lucia have?

LUCELEC has an installed electricity generating capacity of 78.4 megawatts (MW), with peak demand of 60 MW. Most of the island's energy is produced from imported diesel fuel that powers electrical generators. Saint Lucia's electricity rates are more than triple the U.S. average.

Is Saint Lucia reliant on fossil fuels for electricity generation?

Like many island nations, Saint Lucia is almost 100% reliant on imported fossil fuels for electricity generation, leaving it vulnerable to global oil price fluctuations that directly impact the cost of electricity. Electricity Sector Data

Can a biomass plant be built in Saint Lucia?

A biomass plant requires large tracts of agricultural land and is not economically feasible. Rivers and waterfalls on Saint Lucia do not have a base flow rate sufficient to power water turbines. The most promising hydroelectric spot is the Roseau Reservoir, which can supply 150 kilowatts (kW).

Is LUCELEC's metering infrastructure reducing Saint Lucia's electrical losses?

Advanced metering infrastructure installed across 20% of LUCELEC's customer base in 2010 reduced technical and nontechnical electrical losses. Despite these efforts, Saint Lucia's transmission losses remain moderately high at more than 9%.

The Resinex division of the Jacobi Group offers a range of complementary (to activated carbon) and stand-alone ion exchange resins for processes such as softening, dealkalisation and heavy metal removal, in addition to the demineralisation range. ... HS-D, there is a complete treatment step for the conditioning of recovered condensate for reuse ...

Recently, a joint venture (JV) of Stantec and Jacobs, named Galveston Coastal Services Joint Venture, was selected by the US Army Corps of Engineers to design a 43km long levee and floodwall system along the coastline near Galveston, Texas. The \$1.9bn project, which is known as the Orange County Coastal Storm Risk Management or "Orange", is expected to take nearly ...
