

Salt energy Benin

What is the energy mix in Benin?

Energy in Benin has a diverse energy mix and takes several forms including: solar, wind, hydropower, biomass, fossil resources, and mineral resources. Out of this energy mix, about 60% of energy comes from biomass. Benin is also dependent on energy imports from Ghana and Côte d'Ivoire.

Is Benin a resource rich country?

Benin is a coastal country located in the Gulf of Guinea in Western Africa, which is a resource rich region. Energy in Benin has a diverse energy mix and takes several forms including: solar, wind, hydropower, biomass, fossil resources, and mineral resources. Out of this energy mix, about 60% of energy comes from biomass.

How much energy does Benin produce?

Energy production According to the ERA, national electricity production in Benin increased sharply between 2010 and 2015, from 113.6 GWh to 323 GWh. Production in 2015 came mainly from thermoelectric power plants using oil and natural gas.

How much biomass does Benin use?

It is worth noting that final energy consumption using biomass in Benin was 46.3%, or 49.3% that of Mali's final biomass energy consumption (4175.8 ktoe), and that of Burkina Faso's (3915.4 ktoe).

Why is Benin importing more electricity from neighboring countries?

In recent decades, Benin has experienced several energy crises that have forced it to import more electricity from neighboring countries like Ivory Coast, Ghana, and Nigeria, via the West African Power Pool (WAPP), to meet demand for its population. The worst crisis occurred from 2007 to 2013.

Is Benin a good country for energy use?

Benin is an agricultural country with rudimentary means of production. Despite the deplorable state of its agricultural development, this sector is still the main exporting sector in Benin. This confirms that Benin has considerable agricultural and domestic waste potential for energy use.

In the last decade, SALT has used its extensive expertise in larger energy systems to install and maintain solar electric (photovoltaic or PV) systems, solar lighting, and Electric Vehicle (EV) charging stations for residential and ...
