

# San Marino atrius energy

How can San Marino reduce emissions?

Entirely dependent on external imports for fuel and energy production, its strategy to cut emissions is to improve energy efficiency in buildings while developing infrastructure for solar power generation. One of the smallest countries in the world, San Marino depends entirely on imports for fossil fuels and energy.

What is marketing solutions manager Atrius's facilities?

Marketing Solutions Manager Atrius's Facilities is a cloud-based building management system (BMS) software solution designed to enhance building operations and reduce energy usage.

Why should you choose Atrius?

Reduce energy, embrace sustainability, unlock efficiency, and enhance experiences. Atrius transforms your building into an intelligent, responsive environment that benefits owners, operators, and occupants.

How can Atrius help reduce energy consumption?

Encourage occupants to reduce energy consumption by sharing dynamic storyboards across public screens. "Atrius makes energy and emissions data readily accessible to faculty, students, and consultants who appreciate the intuitive, user-friendly format." Ready for a deeper dive?

How can Atrius's energy help Weber State save money?

Automatically normalize data against weather or occupancy changes to compare building performance across locations. "Weber State has saved over \$2.3 million since 2020 using Atrius's Energy to identify, scope, and verify energy projects." Encourage occupants to reduce energy consumption by sharing dynamic storyboards across public screens.

What is Atrius facilities?

"Buildings have long been large, complex assets with so much untapped potential; Atrius Facilities is designed to unlock that value by using data to create meaningful differences in how end users experience spaces," comments Michael Westerfield, Senior Director of Product, Building Performance Applications, Atrius, Acuity Brands.
