

What is Schmid Energy Solutions?

Schmid energy solutions is a Swiss family business that has been dealing with energy issues for over 85 years and employs 380 people. They have evolved to become an international specialist and manufacturer of systems for biomass energy.

What types of industrial systems does Schmid AG offer?

Industrial Systems include wood-fired boilers with an output of 180 to 8000 kW. A large number of biogenic solid fuels can be used as energy sources. Schmid AG has a 24h customer service (365 days) and thus ensures that the clientele is looked after around the clock.

Is Schmid still a company?

The headquarters of the Schmid Group are still located here today. The slogan "wood energy stored" became a hit. Schmid was the first company in the world to sell log firing systems with storage. Smiled at by competitors, hotly sought after by customers. Today, the use of an accumulator is required by law.

What is a Schmid accumulator?

Schmid was the first company in the world to sell log firing systems with storage. Smiled at by competitors, hotly sought after by customers. Today, the use of an accumulator is required by law. Compared to the injection firing system, the new underfeed firing system also allowed forest chips or chips from the wood industry to be used as fuel.
