

Selling price of old photovoltaic packaging panels

Should you buy used or refurbished solar panels?

When you consider buying used solar panels, there are used or refurbished options. Used ones have had previous owners, which could be a homeowner or business. Then refurbished solar panels have good condition by a fix-up crew or the original maker.

Should I resell or recycle used solar panels?

The first step in your assessment to determine whether to resell or recycle used solar panels is to conduct a hardware audit. This step should ideally take place before decommissioning; however, you can still complete a thorough audit after the fact as well. While the PV system is still connected, inspect and test the modules.

Are decommissioned solar panels resaleable?

"As long as the panel still has 10-12 years of energy production and is functional, it has resale value. The price is a third of the standard market price. But rubbish goods are never acceptable for resale." R3 Tech follows a strict practice to ensure decommissioned panels are properly sorted for resale or recycling.
