What is Senegal's energy policy?

The IEA's Energy Policy Review of Senegal 2023, published today, finds that energy is at the heart of Senegal's 2035 strategy for accelerating sustainable development and economic growth known as the Plan S&#233;n&#233;gal &#201;mergent (PSE), or the Emerging Senegal Plan.

What is the energy mix in Senegal?

In 2013, the Republic of Senegal adopted the strategic energy plan, which aimed to increase the energy mix dynamic in the country for a five years (2013-2018). The energy mix refers to the development of power generation from coal, gas, hydro, solar and wind. Current percentages of power generation:

Why is Senegal implementing a gas to power program?

As mentioned above, Senegal is implementing a gas to power program in the energy sector. The purpose of the program is to convert existing thermal power plants to dual-fuel and to build future thermal power plants using natural gas as a primary energy source.

Will Senegal become an oil and gas producer in 2024?

This partnership could mobilise up to EUR 2.5 billion to support Senegal's efforts to achieve universal energy access and strengthen a resilient, secure and sustainable energy system that fosters sustainable development and economic growth. In 2024, Senegal is expected to become an oil and gas producer.

Will Senegal become an emerging economy by 2035?

The development of Senegal's energy sector is at the heart of the country's strategy for sustainable and economic development and aspiration to become an emerging economy by 2035 under the Plan S&#233;n&#233;gal &#201;mergent (PSE).

How will Senegal's power sector be strengthened?

Senegal's power sector would be strengthened by continued diversified investment in power, including renewables and natural gas, while phasing out heavy fuel oil. Senegal Energy Outlook - Analysis and findings. An article by the International Energy Agency.
