

How many employees does RES Group have?

Established in 1982, the RES Group comprises approximately 2,000 full-time employees who are dedicated solely to the development and construction of renewable energy projects. Globally, RES has developed and/or built over 17 GW of renewable energy and energy storage capacity and manages a portfolio of generation assets exceeding 5 GW.

Are emerging energy paths in Senegal based on EEG?

This study provides a contribution to fill that gap by exploring the emerging energy paths in Senegal through the lens of EEG, using the framework of regional path creation processes to analyze qualitative interview data from 17 experts in the Senegalese energy sector.

What is the second emerging path in the Senegalese energy sector?

The second emerging path in the Senegalese energy sector arises from the mini-grids and stand-alone solutions, markets not yet penetrated by foreign investors. These give local companies an opportunity to shape the market according to their capabilities, the needs of the population, and local conditions.

Who is Res Canada?

Renewable Energy Systems Canada Inc. ("RES Canada") is part of the RES Group, one of the most experienced developers and constructors of renewable energy projects in the world.

How has the Senegalese energy sector changed over the years?

While the Senegalese energy sector has for decades been characterized by the dominance of the Ministry of Energy and the state-owned power utility Senelec, reforms of the sector have been carried out with multi-actor involvement and under the strong influence of bi- and multinational institutions.

What do we know about Senegal?

What we do know about Senegal has come from one dimensional investigations. Van den Bold recently examined the electricity sector reforms in Senegal with regard to private sector investments.

*An estimate of the number of pioneer workers needed for initial church planting among unreached people groups by country. Estimates are calculated only for unreached people groups and are based on ratio of 1 worker-unit (single person or married couple) per 50,000 living in an unreached people group by country, or for example one team of four ...
