Make space for the solar panel accessories (solar inverter, cables and solar batteries, if desired), for instance in a plant room 4. Plan a day for installation 5. Erect the scaffolding (this can be done by your supplier or by a company you organise) 6. The solar panel mounts will be installed 7. The professionals will install the solar panels 8.

How do I install a solar PV system?

The first step in installing a solar PV system is meeting with a qualified solar installer. During this initial consultation, the solar company will: - Assess your energy needs : By reviewing your electricity bills and understanding your consumption patterns, the installer can recommend the right size and capacity of the solar system.

How does a solar panel installation work?

The installer will have to lift some of the roof tiles to fix the anchors to the rafters in the loft. This will give the solar panel mounts a stable foundation, and will make sure they don't get damaged in stormy weather. Once the roof anchors have been fixed to the property, the installer will attach the solar panel mounting system to them.

How long does it take to install solar panels?

For example, solar panels can also be mounted on a wall. Once the scaffolding is up, the panels are usually installed in less than a day. The total time it takes can be affected by the type of property, the size and complexity of the solar panel system, as well as any unexpected, dangerous weather conditions.

What is needed to install solar panels on UK homes?

Here's a quick guide to what's needed to install solar panels on UK homes: An installer should visit to determine if the property is suitable for solar panels. They will look at the size and orientation of the roof to decide the best location and angle for installing panels.

Can solar panels be installed vertically or horizontally?

The panels themselves can be installed vertically or horizontally. Once the mounting system is set up, it's time for the moment we've all been waiting for: getting the solar panels onto the roof. Your installer will start by placing the solar panels onto the mounting system, without fully securing them just yet.
