

Seychelles battery tower

Where are the solar power plants located in the Seychelles?

The facilities include the 5MW solar PV plant located in Ile de Romainville, a 3.3 MWh energy storage system located on Mahé; and a 33kV system that allows for the safe and stable supply of electricity from the PV power plant to the main island of Mahé. This system helps increase the resilience of the national grid of the Seychelles.

What is the energy storage system in the Seychelles?

The project includes an energy storage system with a capacity of 5MW and 3.3 megawatt-hours (MWh), allowing for the safe and stable supply of electricity from the PV power plant to the main island of Mahé; and further increasing the resilience of the national grid of the Seychelles.

Does Seychelles have a 5MW solar PV plant?

The Republic of Seychelles has inaugurated its second clean energy project, a 5MW solar PV plant with battery storage. The Republic of Seychelles has inaugurated its second clean energy project, a 5MW solar PV plant with battery storage.

Why is the PUC planning a power transition in Seychelles?

For the next four to five years, the PUC has carefully scheduled this transition in order to guarantee a stable energy supply that can sufficiently sustain the nation's economy. Seychelles currently has a total power generation capacity of 129MW, mostly produced by PUC, through its diesel power plants and solar farms.

Who financed the Seychelles wind turbine project?

The project was financed by Abu Dhabi Fund for Development (ADFD), and is being developed by Masdar and the Seychelles' Public Utilities Corporation (PUC). The PV array is specifically designed to maximise the use of available land, while allowing for maintenance of the wind turbines and minimising any shading losses resulting from them.

How much energy will the Seychelles save a year?

This system helps increase the resilience of the national grid of the Seychelles. It is estimated that the project will save approximately 2 million liters of fuel annually and offset 6,000 tonnes of carbon dioxide. Have you read?
