The CAB1000's modular design with 1-1.5 MW blocks allows you to easily scale your system to meet your specific needs. Whether you're starting with a smaller solar farm or planning a large-scale energy storage facility, the CAB1000 has the ability to grow with your operation - maximizing your investment and minimizing the need for complex overhauls in the future.

We also have a wide range of Active Front End (AFE) inverter solutions for renewable energy applications like PV power plants and Battery Energy Storage Systems (BESS). Our Power Conversion Systems (PCS), which are based on our LV drives, are the most widely used in Europe for energy storage.

With increasing demand for solar power in residential applications, the need for smarter and well-connected solutions has never been more important. The high penetration of renewable energy, together with the continuous growth in demand for a highly reliable energy supply means that solar inverters need to be
