

Does Siro have a production capacity for Togg?

Officially, not all of the production capacity has been earmarked for Togg (more on its plans in a moment). According to earlier information, Siro will also supply customers of Farasis Energy Europe as well as its own customers in the fields of automotive, industrial applications and stationary storage solutions.

What will Siro do?

Siro will present its developed energy storage solutions to global markets, and will provide services in the field of energy storage solutions that will support renewable energy, electric grid, charging stations and residential solutions besides automotive, and will be directly responsible for 120 countries in the region besides Türkiye.

Who is Siro energy?

Siro Energy is a Renewable Energy Semiconductor Manufacturing company located in TR with 752 employees. Find top employees, contact details and business statistics at RocketReach.

Will Siro make its own battery cells?

"Siro will then develop and manufacture its own innovative battery cells, based on Farasis Energy's latest technology," the statement said. Togg priced its debut vehicle T10X in Turkey in March and plans to start deliveries there in July 2023.

Will Siro supply Farasis Energy Europe?

According to earlier information, Siro will also supply customers of Farasis Energy Europe as well as its own customers in the fields of automotive, industrial applications and stationary storage solutions. In addition to cell production, a laboratory for the development of Farasis cells will also be built at the site by the end of 2023.

What will Siro do in 2031?

Production capacity is scheduled to reach 20 GWh/a by 2031 and can be increased even further. In addition to the cell production, a state-of-the-art cell lab will be built by the end of 2023. Siro will then develop and manufacture its own innovative battery cells, based on Farasis Energy's latest technology.
