

What is the technical potential of solar energy in Slovakia?

The solar radiation flux achieves a maximum of 1,100 kWh/m². The technical potential of solar energy has been estimated at 5,200 GWh annually, which is about 20 % of the total technical potential of renewable power sources in Slovakia. There is growing demand for supply of photovoltaic power plants and solar panels for installations on roofs.

How many MW are there in Slovak solar power?

While the so-called solar boom was not as intensive as in some other Member States, for instance, in Czechia, the Slovak electricity market still experienced a rise of installed PV capacity by over 300 MW in a single year. 573 MW. The past development of solar PV capacities is illustrated in Graph 2 provided below.

Why are new solar PV plants being installed in Slovakia?

Soaring energy prices, new reserved capacities for renewables, and a few incentive schemes, among other factors, are likely to result in new large-scale solar PV plants being deployed in Slovakia, significantly increasing the installed capacity in coming years.

How can Slovakia stay on track with solar PV?

In order to stay on track, Slovakia needs to implement the total of 2,855 MW in solar PV plants by 2030. Hence, this scenario requires a clear action of the Slovak Government and a preparation of an enabling investment environment that would allow for a rise of new solar PV capacities.

How much bioenergy will Slovakia have in 2027?

nology, behind hydropower and solar PV in 2030. Until then, Slovakia should have 400 MW of installed bioenergy capacity, evenly divided between solid biomass and biogas. According to the NECP, this milestone should be reached by 2027 already.

Will NECP be able to harvest Slovakia's solar potential?

The current Slovakia's NECP projects a solar PV target of 1,200 MW cumulatively installed in 2030. While the NECP does not specify the character of these capacities, it is to be assumed that both ground-mounted and rooftop PV will play a role in harvesting Slovakia's solar potential.
