

Will Slovenia add 258 MW of solar capacity in 2022?

Slovenia could potentially add 258 MW of new solar capacity in 2022, according to new figures from the Slovenian Photovoltaic Association (SPA). The country installed 194 MW of solar in the first three quarters of 2022, according to its distribution system operator, SODO. Almost all capacity was added in the residential sector.

What is Slovenia's new solar energy plan?

The plan envisages opening the Slovenian energy market to large-scale solar plants and is intended to reduce the country's dependence on fossil fuels. The Slovenian solar manufacturer is offering its new product with outputs of 260 and 300W, respectively.

How many MW will Slovenia's solar arrays have?

Overall, the arrays will have a combined capacity of around 20 MW. "Electricity consumption is increasing year by year, while Slovenia's self-sufficiency is falling for the third year in a row," said Slovenian Minister for the Environment Bojan Kumer.

Which solar panels are available in Slovenia?

Slovenian solar manufacturer Bisolis offering new solar panels with outputs of 320 W and 410 W. Front efficiencies range from 16.4% to 17.3% and the temperature coefficient is -0.34% per degree Celsius. Only 5 mins! - Year of change for Slovenia's PV market

Do solar power plants need a building permit in Slovenia?

Solar power plants with the maximum power of up to 1MW are, according to the Decree, considered small power plants and do not require a building permit to be installed. The Decree simplifies investing in renewables and is a welcome change as procedures for obtaining building permits in Slovenia can be time-consuming. 3.

Are there wind power plants in Slovenia?

As certain regions in Slovenia are windy, opportunities for construction of wind power plants exist. Three are planned in the Eastern region of Slovenia by the investor Dravske elektrarne Maribor d.o.o., with a total capacity of 46MW and 122GWh annually, as well as another project being developed by Stiria Invest.

Hydropower plant operator Hidroelektrarne na spodnji Savi (HESS) has officially opened Slovenia's biggest solar power plant, with an installed capacity of 6 MW. Together with the Brežice hydropower plant, it ...

In total, 49,092 solar power plants with a total capacity of 1,104.5 MW were in the system on 31 December 2023. In the last two years, two-thirds of the country's solar power generation installations have been

connected to the grid. Aim to meet EU renewables targets

Slovenia's most significant solar power plant has commenced operations. The EUR5.5 million facility, which has a maximum output of 6 MW, is expected to provide power to roughly 1,800 households. Its unique feature is ...

Luxen Solar announces the successful installation of the second largest Slovenia's solar projects to date: the 3.3 MW rooftop installation for the Port of Koper. The project was entrusted to local engineering company RIKO d.o.o.

Luxen Solar announces the successful installation of the second largest Slovenia's solar projects to date: the 3.3 MW rooftop installation for the Port of Koper. The project was entrusted to ...

The Energy Agency of Slovenia approved subsidies for 43 projects, of which 36 are for solar power plants with capacities from just 45 kW to 1.3 MW. The government covers the difference between the accepted price ...

Slovenia's most significant solar power plant has commenced operations. The EUR5.5 million facility, which has a maximum output of 6 MW, is expected to provide power to roughly 1,800 households. Its unique feature is its direct connection to the 110-kilovolt transmission network and the hybridization with the Brežice Hydropower Plant.

The Ministry of Infrastructure is drafting a plan to install a new 1,000MW (1 GW) solar PV capacity in Slovenia with the support of the national transmission system operator (ELES) and the distribution system operator SODO. Due to its strategic location, Slovenia is essential to the European electricity market.

In 2023 Slovenia added 400 MW in solar power, exceeding 1 GW in total capacity. The country also entered the list of the top ten European Union member countries in installed solar power per capita. At the end of ...

In 2023 Slovenia added 400 MW in solar power, exceeding 1 GW in total capacity. The country also entered the list of the top ten European Union member countries in installed solar power per capita. At the end of 2022, Slovenia had solar facilities of an overall 697.7 MW, and with last year's expansion the level reached 1,101.5 MW, the ...

The Ministry of Infrastructure is drafting a plan to install a new 1,000MW (1 GW) solar PV capacity in Slovenia with the support of the national transmission system operator (ELES) and the distribution system operator SODO. Due to its ...

Hydropower plant operator Hidroelektrarne na spodnji Savi (HESS) has officially opened Slovenia's biggest solar power plant, with an installed capacity of 6 MW. Together with the Brežice hydropower plant, it makes a

hybrid system. At the same time, Brežice's water reservoir will provide energy storage.

The Energy Agency of Slovenia approved subsidies for 43 projects, of which 36 are for solar power plants with capacities from just 45 kW to 1.3 MW. The government covers the difference between the accepted price for the project benefitting from the mechanism and the benchmark electricity price, for the facility's planned annual output.
