Slovenia northland power

How much energy does Slovenia produce?

Slovenia generated 68.8% of its electricity with zero carbon or carbon neutral sources in 2019, dominated by nuclear power and hydroelectricity. Fossil fuels oil, coal, and natural gas contributed 61% of the total energy supply of Slovenia in 2019.

Where does Slovenia's electricity come from?

Roughly one-third of Slovenia's electricity comes from hydroelectric sources, one-third from thermal sources, and one-third from nuclear power (with non-hydro renewables constituting two percent of the total). Almost half of Slovenia's total energy consumption consists of imported petroleum purchased on global markets.

What makes Northland a great power company?

A strong,seasoned management team with extensive power industry experience. Northland produces electricity from renewable resources such as wind,solar and clean-burning natural gas. The company partners with Indigenous partners,municipalities and independent companies to develop and operate power-generation facilities globally.

Is nuclear energy the future of Slovenia's energy mix?

In July 2021, following Parliament's approval of Slovenia's long-term climate strategy, the Ministry of Infrastructure issued the energy permit for the second reactor at Kr?ko nuclear power plant, sending a strong signal on the future role of nuclear energy in Slovenia's energy mix.

How many wind turbines are there in Slovenia?

A solar power plant with a capacity of 6MW opened in 2023 at Bre?ice,linked to the hydro power plant. Slovenia had just 2 wind turbinesin 2022. Onshore wind energy potential for Slovenia is typical of central and eastern Europe.

Does Slovenia have solar power?

Per analysis published by the World Bank which considers natural features of a location such as altitude, humidity, cloud cover, and topography, Slovenia's solar PV potential is relatively low compared to global resources, but is comparable to that of other central and eastern European countries which lie north of the Alps.

The company continues to perform services of storage of petroleum products as part of the statutory national reserves and systemic services in the power system. Two gas-powered generators have been preserved at the location and may be ...
