

Small solar panel power generation scam

Are solar panels a scam?

That is, of course, also a scam. To protect yourself from clean energy scams: Know that "free" or "no cost" solar panel offers are scams. The federal government does not install solar systems in homes for free. If you're considering whether solar energy is right for you, check out the Department of Energy's guide for homeowners and learn more.

How does a solar installation scam work?

How the scam works: People posing as solar installers or utility employees call or come to your home and offer free solar panels through made-up government programs or incentives. Sometimes they also claim their company will cover the cost of installation by providing huge rebates.

How do I know if a solar company is a scam?

Look up existing scams. The Better Business Bureau has a free scam tracker. You can search by company name or keyword to see if there are any active scams in your area. Ask questions. A legitimate solar company will be happy to answer questions. If they get pushy or dodge your questions, that's a red flag.

Are solar business leads a scam?

At best, this is someone generating leads to sell, not actual solar businesses. At worst, they're scammer trying to steal your identity. If you spot a scam, tell the Federal Trade Commission at [ReportFraud.ftc.gov](https://www.ftc.gov/identity-theft).

Should you choose a reputable solar energy company?

When temperatures rise, utility costs do, too. While reputable companies can help you save money with clean or solar energy improvements, scammers offer more than they can deliver.

Are solar salespeople a bad thing?

But the solar industry is full of bad actors, with solar salespeople knocking at your door with misleading offers and overpromised savings. Solar salespeople might try to lure you in with promises of free solar panels and limited-time special deals. In most cases, these are just aggressive sales tactics they'll use to rush you into a contract.
