

Solar assistant via Bermuda

How can solar panels be used in Bermuda?

Deploy solar panels in discrete locations to meet Bermuda Government and satisfy listed building planning regulations. Optimize available ground space and create economies of scale while effectively addressing aesthetic considerations. Construct a dedicated facility designed for solar installation that doubles as a shade provider or carport.

What is solarassistant?

SolarAssistant is software used to monitor and control your solar system in real time and can be purchased from the SolarAssistant site. This instructable is designed as a technical reference for myself & also a guide for someone considering using SolarAssistant with a similar setup.

Who is Bermuda Engineering Company Limited?

Bermuda Engineering Company Limited was founded in 1935 by Gordon Hamilton Burland, a Bermudian renewable energy pioneer and engineer. Back then, he built the first clean energy microgrid in Bermuda and demonstrated bold energy leadership for his time. In 2010 the company was reinvigorated and has been operating as BE Solar since.

How do I connect my solarassistant to my Internet router?

A standard RJ45 to RJ45 network cable then connects to my internet router (you can also use WIFI if your router is in range). Once connection is established your SolarAssistant will be accessible on your home network as well as anywhere in the world via the internet.

How do I connect solarassistant to a Raspberry Pi?

SolarAssistant is powered from a 5v Raspberry Pi PSU plugged into a wall socket off the standard ring main in my garage. A USB to RS485 CP2102 converter plugs into a USB port and the A+ & B- outputs are connected to pins 4 & 5 of a RJ45 plug. The RJ45 plug is connected to the top right socket on the inverter marked RJ45.

How do I boost my solarassistant battery?

Using the "Priority Settings" and "Priority Schedule" on SolarAssistant the inverter is set to "Battery First" from 02:00 to 05:00. During this period if the battery falls below a set charge level it will be boosted to maintain its charge at this set level until 05:00.

The main dashboard displays a real-time view of the most important metrics including any possible alerts or inverter faults that might be in effect. Below is an example dashboard of a Voltronic/Axpert/MPP Solar inverter. The battery ...

Solar Assistant ist ein AI-gesteuerter Assistent, der entwickelt wurde, um Menschen bei der Nutzung von Solarenergie zu unterstützen. Er bietet Informationen und Ratschläge zur Installation und Wartung von Solaranlagen, zur Optimierung der Energieerzeugung und zur Einsparung von Energiekosten. Darüber hinaus kann Solar Assistant auch dabei ...

Why have Solar Assistant in the middle if the data can be sent straight to Home Assistant with a much more customizable experience? My best guess is the ease of setup, support for many inverters / BMS, and remote inverter configuration. \$80 is easily worth it if I am saving many hours of reading and configuring.

RJ45 splitter tailored for use on the Deye/SunSynk/Sol-Ark 2 in 1 BMS port separates the CAN and RS485 communication from each other. Why did we design a product specifically for the Deye/SunSynk/Sol-Ark BMS port?

Troubleshooting. Are you seeing the page below when accessing your site? This guide will help you identify the root cause of the problem. The inverter and battery connection does not affect whether your site is reachable so you don't have to ...

An example URL is `xxxx.solar-assistant.io`. In this guide we are going to use Chrome, but it should be very similar with other browsers. Step 2. Select "Install app" or "Add to home screen" from the browser context menu. Step 3. Select ...

Step 1. Select "Advanced" on the "Configuration" page. Step 2. Set your grid provider to EPEX or Nord Pool. The purpose of the Price multiplier is to get the price closer to the price you are paying your grid provider. A price multiplier of 1.0 is the wholesale electricity price which is most likely much lower than what you are paying.

The main dashboard displays a real-time view of the most important metrics including any possible alerts or inverter faults that might be in effect. Below is an example dashboard of a Voltronic/Axpert/MPP Solar
