

Solar automatic water tank bracket

What is a solar powered plant watering kit?

Solar-powered Automatic Plant Watering Kit: No tap is required. Preset start time, last time, frequency and delay time. Low water level indicator to avoid pump idling or water shortage. Ideal for balconies, patios, and small gardens without a faucet or power supply. Effortless and worry-free plant care.

What is a small Solar powered irrigation kit?

This is a small solar powered irrigation kit. Comes with 50 feet of flexible plastic tubing, and 15 dripper irrigation spikes and all the connectors and splitters needed. The pump/controller is battery powered and has a solar panel for charging. The battery can also be charged with the included USB power cord if necessary.

How long does a solar watering system last?

Dual Power Supply: Never worry about running out of power anymore. Equipped with a 5W solar panel and a 2600mAh built-in battery, this system ensures continuous operation. It still functions after a few overcast days. Fully charged once and with ample sunlight, enjoy at least 3 months of watering.

What is a solar-powered irrigation control unit?

The control unit consists of a pump, solar panel and irrigation control all in one and can be placed wherever you wish. Solar-powered irrigation: Evenly waters up to 20 plants to a maximum height of 4 m, ideal for when you're away on holiday

How does a solar pump work?

The solar pumps draw water from your rain barrel and pump the water to your plants through a drip irrigation system. The smaller size is best suited for 12x 20L pots, or 12 tomato plants, or 24 pepper plants, or 36 strawberry plants, or a combination up to 12m in length for raised beds. The larger unit has double the capacity.
