What is the best solar battery in Kenya?

The best solar battery in Kenya is definitely a deep cycle battery. Deep cycle solar batteries can be categorized into two; lithium ion batteries and lead acid deep cycle batteries. Lead acid batteries have been around for a really long time. They are the batteries used in cars. Deep cycle lead batteries are specifically used in solar systems.

Are solar batteries good for car batteries?

Batteries in solar applications meet a lot of demands in terms of heavy charging, discharging and irregular full charging. As such, these batteries are built to withstand these applications. Car batteries cannot be fully discharged. They are also made to give short bursts of electricity to either ignite, light or start a vehicle.

What makes a good solar battery?

To overcome these shortcomings, the best solar batteries are made with what is called the deep cycle technology. Deep cycle technology allows a solar battery to be discharged slowly over a long period of time until it has nothing left to give and then recharge and be ready for use again.

What is the capacity of a solar battery?

The capacity of the solar battery is the total amount of electricity that the battery can store. It is usually measured in kilowatt hours - kWh. If you bought a smaller battery or your power needs have increased, you can stack more batteries to increase the capacity.
