What is a solar boiler?

Solar Boilers are a Steam Age source of Power Generation that turns water into steam with sunlight. There are two variants, the Simple Solar Boiler and High Pressure Solar Boiler which has three times the output of the former. Both require silver to craft, which makes them difficult to source before having access to the Twilight Forest at LV.

What is a high pressure solar boiler?

The High Pressure Solar Boiler is an upgraded version of the Simple Solar, producing 360L/s at full power. It calcifies in the same way, but will never go below 120L/s. It can be restored to full capacity by breaking and replacing when it starts to lose production.

Do solar boilers need access to the sky?

Solars also need access to the sky- water blocks their function, but glass and other transparent blocks will not. Non-solid blocks like wires and pipes can also be run over the top of Solar Boilers without impacting their functionality.

High pressure solar boilers make 360L of steam per second. So if you want the EBF to run at 100% uptime means you need 18 high pressure solar boilers. That said you can use a mix of power sources and you don't exactly need to run it with 100% uptime right out of the gate, and getting to MV allows you to have access to better machines and thus ...

Solar boiler gtnh Isle of Man

I lasted most of LV/MV with a solar boiler set-up feeding 4 LV steam turbines. Once I hit HV I upgraded to a Steve's Carts tree farm -> Advanced Coke Oven -> GT large steel boiler -> HV steam turbine. ... The boiler almost produces enough steam for the turbine to run full power but the tree farm can't keep up, I end up having to run the turbine ...
