Where can I find solar panel fasteners?

Melfast is the place to find solar panel fasteners. For 30 years, we have been providing fasteners of all shapes, types, and sizes. We have over 30,000 items in stock and ready to go.

How to mount solar panels?

To mount solar panels, lag bolts are used to hold down the mounting base. For fasteners involved, high quality stainless steel should be used to avoid corrosion due to the constant exposure to elements. Mounted on top of a pole, a durable frame or rack is used for solar pole mounts.

What is the best way to install solar panels?

For solar panel systems, lag bolts are used to hold down the mounting base for rooftop installations. Asphalt roofing shingles are used for waterproofing and to fasten the racks. To collect the highest level of sunlight and for optimal positioning and angle, rooftop installations are the most common choice for solar panel systems.

What size roof bracket is best for corrugated roofing?

Strong Enough for Heavy-Duty, Commercial Applications, Mount Almost Anything to 7/8" and 3/4" Rib Pitch U.S. Corrugated Metal Roofing. Bottom-Fixed, Low-Profile Metal Roof Bracket for Corrugated Roofing. CorruBracket is ideal for mounting snow guards and other heavy-duty applications to corrugated roofing.

Does a versa bracket need a sealant?

If you have face-fastened, trapezoidal ribbed panels, or a non-metallic roof, our VersaBracket is for you! It requires no messy, field-applied sealants and leaves no risk for leaks. That's because the VersaBracket comes with factory-applied sealant already in the base to waterproof its attachment.
