The payback period for solar cells refers to the time it takes for the initial investment in solar panels to be recouped through energy savings. On average, the payback period for solar cells is around 5 to 10 years, depending on factors such as the cost of the installation, the amount of sunlight available, and the electricity rates in the area.

Almost a month ago, the Jamaica Energy Council met to discuss the country's crippling reliance on imported fuel. Chaired by the Minister of Science, Technology, Energy, and Mining, Phillip Paulwell, the bi-partisan meeting discussed how annual spending on foreign oil had increased from \$800 million to \$2.7 billion in a span of 5 years.. Worse still, crude oil prices are ...
