

Which solar energy options are available in Sudan?

In Sudan, three solar energy options are available: 1. Solar PV energy: 1000 MW (on- and off-grid) will be applicable in different states within Sudan. 2. Solar CSP technology: 100 MW (grid connected) will be applicable, especially in the northern part of Sudan. 3. Waste to Energy: 80 MW (grid connected) will be applicable in several intended sites.

Is Sudan suitable for solar energy production?

According to Abdeen M.O.(2009,p.9), Sudan is considered one of the best countries for exploiting solar energy due to its average sunshine duration, which ranges from 8.5 to 11 hours a day.

What is Sege Solar Energy Group Europe?

The SEGE Solar Energy Group Europe focuses on the conservation of the necessary land areas as grassland in its open space solar power plants. Solar power plants require large open spaces. Mostly fallow areas with poor soil quality or lack of water are used for this, on which agricultural use is unprofitable.
