How do government policies help promote solar energy deployment?

At the federal level, several key policies, programs, and regulations help promote solar energy deployment. Many of these policies help reduce the capital costs associated with developing new solar projects, making solar a more attractive option for communities across America.

How will EPA's 60 solar for all program help low-income households?

EPA estimates that the 60 Solar for All recipients will enable over 900,000 households in low-income and disadvantaged communities to deploy and benefit from distributed solar energy. This \$7 billion investment will generate over \$350 million in annual savings on electric bills for overburdened households.

What is EPA's solar for all grant?

On April 22, 2024, the U.S. Environmental Protection Agency (EPA) awarded the Connecticut Department of Energy and Environmental Protection (DEEP) with a \$62.45 million grant under its Solar for All initiative, including \$400,000 of in-kind services from EPA in the form of technical assistance.

What is the \$7 billion solar for all program?

Oops, something went wrong. Check your browser's developer console for more details. Under the \$7 billion Solar for All program, the 60 grant recipients will create new or expand existing low-income solar programs, which will enable over 900,000 households in low-income and disadvantaged communities to benefit from distributed solar energy.

How can state policies help grow solar energy?

Many policies that advance the growth of solar energy are established at the state level. This can include state tax incentives for solar, which provide an additional tax benefit on top of the federal ITC. Other state policies, discussed below, can include:

Who will receive a \$7 billion solar grant?

Washington - Today, April 22, as the Biden-Harris Administration celebrates Earth Day, the U.S. Environmental Protection Agency announced 60 selectees that will receive \$7 billion in grant awards through the Solar for All grant competition to deliver residential solar projects to over 900,000 households nationwide.

This is why the Solar Energy Technology Office at DOE set a new 2030 goal of cutting the cost of solar (PV) to \$0.02 and \$0.05 per kilowatt-hour without subsidies, for utility ...

As one of the renewable energy, solar energy has the greatest potential to attain carbon dioxide (CO<sub>2</sub>) emission reduction and environmental protection (Urban et al. 2016). It has been found ...
