

Why is solar power growing in Germany?

In 2004, Germany was the first country, together with Japan, to reach 1 GW of cumulative installed PV capacity. Since 2004 solar power in Germany has been growing considerably due to the country's feed-in tariffs for renewable energy, which were introduced by the German Renewable Energy Sources Act, and declining PV costs.

How much solar power does Germany have?

At the end of 2023, the country boasted a capacity of about 61 gigawatts (GW), according to figures by solar PV industry group BSW Solar. In contrast to conventional energy systems focused on big and centralised producers, tens of thousands of small solar panel operators have become an important part of the German energy system.

What happened to solar power in Germany?

Since the technology's large-scale launch through the Renewable Energy Act in the year 2000, German companies quickly ascended to global leadership in solar power technology before a collapse after 2012 forced many of them to drop out of business - and continue to struggle with cheaper competitors more than 10 years later.

Do solar panels contribute to Germany's Power Mix?

Solar arrays can contribute a much greater share to the German power mix during particularly sunny times. On 7 July 2023, solar power reached its highest output ever in Germany so far, providing 68 percent of the entire electricity mix at about noon, when both sun intensity and usually also power consumption are at peak levels.

Is Sonnen the most innovative energy company in Germany?

The business magazine 'brand eins' and Statista placed Sonnen among the most innovative energy companies in Germany. In the 'Energy and Environment' category, Sonnen was the only entrant to receive the highest rating among companies with 250 to 1,000 employees. How can we help you further?

Who owns Germany's largest solar park?

LIMA Group GmbH. ^CFB News: Commerz Real Acquires Germany's Largest Solar Park. 'CFB-Fonds'; 'MKG GÖBEL /120 MWp solar park Schornhof'; MKG GÖBEL. 30 January 2023. Retrieved 28 June 2023. 'Gaarz, Deutschland - ENERPARC AG' (in German). Retrieved 28 June 2023.

More than one million new solar power systems were installed in Germany last year, an all-time record, according to the country's solar industry association BSW. The new arrays had a combined capacity of around 14 gigawatts, an increase of 85 percent compared to 2022, when new installations added up to around 7.5 GW.

Solar energy group Germany
