

Does Ecuador have an electricity market?

In this research, an analysis of the electricity market in Ecuador is carried out, a portfolio of projects by source is presented, which are structured in maps with a view to an energy transition according to the official data provided.

Why is the Ecuadorian electricity sector considered strategic?

The Ecuadorian electricity sector is considered strategic due to its direct influence with the development productive of the country. In Ecuador for the year 2020, the generation capacity registered in the national territory was 8712.29 MW of NP (nominal power) and 8095.25 MW of PE (Effective power). The generation sources are presented in Table 1.

How much wind energy does Ecuador have?

4.2.3. Wind energy According to the wind atlas of Ecuador [36,39], in the useable areas, the average annual wind speeds exceed 7 m/s at 3000 m above sea level, indicating a feasible potential of 891 MW in the short term, which would be added to the 21.15 MW of power in service (16.5 MW on the mainland, and 4.65 MW on the insular region).

What is the useable solar potential of the country?

The useable solar potential of the country, for its part, is estimated at 660 photovoltaic MWp, located in places with a high level of irradiation, feasibility of connection and areas that do not present environmental, social, etc. limitations, such as: Carchi, Pichincha, Cotopaxi, Manabí, Imbabura, Chimborazo, El Oro, Loja and Guayas (Fig. 10).
