A solar-powered generator is a system that converts sunlight into electricity using attached solar photovoltaic (PV) panels. Unlike traditional generators that run on fossil fuels, solar generators produce clean, renewable energy without emitting greenhouse gases.

If your average gas generator costs about \$1000 a similar output solar generator is going to cost you somewhere close to \$2000 - and maybe even more. Solar generators have lower operating costs in the long haul to offset that initial expense, but it still a pretty big hit to your bank account right away.
