Now people can use the PV array that they already paid for to create backup power when the grid goes down. This simple, clean, scalable approach has many advantages over generator and AC coupled solutions." - Sequoya Cross, CEO, Backwoods Solar. Most grid-tied solar systems will not receive power from their PV arrays during a grid failure.

Grid-tied solar systems. Grid-tied systems are solar panel installations that are connected to the utility power grid. With a grid-connected system, a home can use the solar energy produced by its solar panels and
