With this new service offerings of power contracting and solar plant leasing, Qcells offers two innovative ways for companies to benefit from low-cost and clean solar power, and to engage directly with the exciting new solar-as-a-service business model - and all while keeping their own investment costs low.

Solar leases are a solar financing option that allows homeowners to use solar electricity without having to pay the upfront cost of installation. Instead, a homeowner makes a monthly lease payment to the solar company in exchange for the solar energy. The solar panels reduce your electricity bill, and the lease payment is designed to be lower than your pre-solar electric bill.

With this new service offerings of power contracting and solar plant leasing, Qcells offers two innovative ways for companies to benefit from low-cost and clean solar power, and to engage directly with the exciting new solar ...

Under a solar lease, this third-party owner (e.g., a solar company) installs solar panels on your property and then sells you the electricity produced at a predetermined monthly rate. Companies calculate this rate based on the estimated annual production of your solar system and include this rate in your contract.
