247Solar Plant(TM) 247Solar Plants generate continuous clean energy all day and night, in any weather. Our next-gen concentrated solar power (CSP) plants capture the sun's energy at a higher temperature (970C) than regular CSP and store it in simple ceramic pellets.

Scale will then acquire, finance and own the portfolio, enhancing its share of community solar projects nationwide. The portfolio will generate enough electricity to power 80,000 homes and small businesses and contribute to a substantial reduction in carbon dioxide emissions, with an estimated annual decrease of 800,000 tonnes.

Development of the four solar-fueled power systems will set the stage to scale the Family Islands solar program across the island chain's outlying islands, as well as contribute to the Bahamas achieving a national goal of renewable energy resources meeting 30% of electricity needs by 2030..
