

# Solar panel factory cost Bahrain

Where is the new Bahraini solar factory located?

The new Bahraini factory is located in the Bahrain International Investment Zone on an area of 4 thousand square meters where they will produce more than 80,000 solar panels per year, while it will contribute to creating 50 jobs as well as attracting more investments to Bahrain and possibly to other Gulf Cooperation Council countries.

How many solar panels can be produced in Bahrain?

Dr Abdul Hussain Mirza, the President of Sustainable Energy Authority, opened Solartecc Green Energy Factory, the second of its kind for solar panels in Bahrain. The 2 million dinar factory, built on four thousand square meters, can produce 80,000 solar panels annually.

Why is Bahrain launching a solar panel factory?

Mr Rabih Abdullah said that the factory provides solar panels for new projects of the public and private sectors, indicating that the project will produce panels for the Kingdom of Bahrain and the Gulf Cooperation Council countries, especially that the Gulf region is on the verge of using renewable energy.

Is Bahrain's first solar panel company the start of a sea change?

This is good news for Solar One, Bahrain's first solar panels company. Since its founding in 2017, the startup boasts of contributing over two megawatts of solar to the country's energy mix -- enough to power around 380 US homes. It's a drop in the ocean, but it hopefully marks the beginning of a sea change.

Why are there no barriers to solar PV installation in Bahrain?

None of the participants mentioned any reported barriers to installation of solar PV in Bahrain. This is likely because solar panel installation is relatively new in Bahrain and the participants were not clear on the specifics involved. Effective dissemination of information is necessary, as explained later.

Are Bahrainis willing to pay the full cost of solar PV systems?

According to the cross tabulation results, majority of participants who were willing to pay the full cost of residential solar PV systems were Bachelor degree holders with the average per-capita monthly income for Bahrainis.

Operational and maintenance costs for solar panels are typically minimal, often ranging from \$1,000-\$2,000 per year for a medium-sized factory. The type of solar panel--Monocrystalline, Polycrystalline, or Thin-Film--also influences the overall cost. Monocrystalline panels, which are often the most efficient, are also the most expensive.

The process of obtaining and maintaining these certifications necessitates a continuous investment in quality control and product development, adding to the overall cost structure of solar panels.
