

Solar panel fence installation

Can solar panels be installed on a fence?

These fences are designed to be robust for security reasons in order to protect livestock. However, in residential examples of solar panel fencing, installation of the panels tends to be simpler. Green Akku, a German-based solar panel supplier, provides solar panel fencing kits that can mount to pre-existing fences.

What is a solar panel fence?

A solar panel fence is, quite literally, an outdoor fence made of solar panels. It provides two purposes: 1) surrounding and separating private properties or land 2) producing renewable solar energy.

Do I need planning permission to install solar panel fencing?

In the majority of cases, the installation of solar panel fencing on private property in place of an existing fence does not require planning permission. However, you would need to apply for planning permission if you are erecting a fence that is over 1 metre high and is adjacent to a road used by vehicles, or over two metres high elsewhere.

How are solar panels installed?

Solar panels are installed vertically in a uniform manner, similarly to a stereotypical wooden or metal fence. They can be installed via posts piled directly into the ground, or on top of a wall. Agricultural solar panel fences have a more heavy-duty installation process. The solar panels are attached to a fencing post via a bracket.

Do solar fence panels need to be cleaned?

Solar fence panels represent a practical innovation in property management, with the added convenience of low maintenance, requiring little more than occasional solar panel cleaning. This guide provides a concise and informative approach to installing solar fence panels.

Do solar electric fences need maintenance?

We've mentioned it before, but we'll mention it again: solar panel products require seriously little maintenance. Just keep the panel clean, and check the voltage it's putting out from time to time, and your solar electric fence can run for years and years.
